September 2015: Economic Sentiment improves in the euro area and the EU

In September, the *Economic Sentiment Indicator* (ESI) improved markedly in the euro area (by 1.5 points to 105.6)¹ and, somewhat more cautiously, in the EU (by 0.6 points to 107.6).

Euro area developments

Enhanced euro-area sentiment resulted from improvements in confidence in industry, services and, to a lesser extent, retail trade, which were only partly outweighed by easing construction confidence. Consumer confidence remained broadly unchanged. Amongst the largest euro-area economies, the ESI rose in Italy (+3.4), Germany (+1.9), the Netherlands (+1.2) and France (+0.9), while it dropped in Spain (-0.9).

Industry confidence (+1.5) was propelled by managers' rallying *production expectations* and, to a lesser degree, improved assessments of the *current level of overall order books*, while the adequacy of the *stocks of finished products* was assessed somewhat more cautiously. Of the questions not included in the confidence indicator, views on *past production* improved while assessments of the *export order books* edged down somewhat. **Services confidence** (+2.3) continued the upward trend it has embarked on at the beginning of the year. Contrary to industry confidence, the rise resulted from better assessments of past developments (*past demand, past business situation*), whereas *demand expectations* were largely inert. **Consumer confidence** remained broadly flat (-0.2), reflecting two opposing forces: While consumers were more upbeat on questions relating to their personal finances (*expected financial situation, future savings*), their views on macro-economic developments (*future general economic situation, future unemployment*) clouded over. The upward development of **retail trade confidence** (+0.6) reflected managers' growing optimism about the *expected business situation*, which was dampened somewhat however by growing concerns about the adequacy of the *volume of stocks*. The assessment of the *present business situation* remained practically unaltered. **Construction confidence**, the only sectoral indicator still below its long-term average, deteriorated somewhat (-0.6), reflecting a combination of lower *employment expectations* and broadly unchanged assessments of the level of *order books*. **Financial services confidence** (not included in the ESI) eased due to worsening appraisals of past developments (*past business situation, past demand*), which were only partially outweighed by brightening *demand expectations*.

Employment expectations firmed in retail trade and industry, while they worsened in construction and remained broadly unchanged in services. **Selling price expectations** rose in construction and services, while they declined in industry and, in particular, retail trade. Consumers' price expectations remained virtually unchanged.

EU developments

Caused by decreases in the headline indicators of the largest non-euro area EU economies, the UK (-2.8) and Poland (-0.7), the ESI booked more modest gains in the EU than in the euro area. Sectoral developments in confidence were qualitatively in line with the euro area, the major difference being a much weaker step-up in services confidence. Employment expectations differed from the euro area through an upward revision in services and broadly flat developments in industry. Price expectations deviated from the EU only in the retail trade sector, which posted an upward revision.

¹ The business confidence indices for France were slightly revised compared to the August press release, causing a downward revision of a decimal point for the euro-area ESI (to 104.1).

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2014) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances.

The country weights have been updated in January 2015.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The Directorate-General Financial and Economic Affairs (DG ECFIN) of the European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by DG ECFIN's Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.
